Arduino test cod:

```
/*
  Blink
  Turns on an LED on for two second, then off for two second, repeatedly.

  This example code is in the public domain.
  */

void setup() {
  // initialize the digital pin as an output.
  // Pin 13 has an LED connected on most Arduino boards:
  pinMode(13, OUTPUT);
}

void loop() {
  digitalWrite(13, HIGH); // set the LED on
  delay(2000);             // wait for a second
  digitalWrite(13, LOW);  // set the LED off
  delay(2000);             // wait for a second
}
```
